

Internship Technical Project Coordinator

Cutting-edge technology! PXL Vision AG is a Swiss software company specialized on software-based digitization technologies for mobile and VR/AR devices. Our PXL Beam[®] technology is based on real-time computer vision, image processing, and machine learning. Our mission is to provide cutting-edge camera-based software solutions to increase the productivity of our customers and to enable the digital transformation of their business. PXL licenses its technology to leading hardware and software companies. For further information, please visit www.pxl-vision.com.

Your tasks! You will act as a Technical Project Coordinator at PXL. In this role, you will have the unique opportunity to manage an exciting and challenging VR project for a major B2B client. Your tasks are to manage and organize the scheduled deliverables, oversee the communication with our development teams and insure the quality and usability of our products. Your work will have a direct impact on hundred thousands of end users. You will benefit from a great learning experience by working closely with our highly skilled R&D teams in different locations in Europe. In addition, you will have regular contact with our international customers and partners and you will have the opportunity to make a real difference in the evolution of PXL Vision AG.

Your skills! Apart from your curiosity, your communication skills and your ability to work in teams, you should meet the following requirements:

- You are currently studying or you have just finished your Bachelor or Master Degree in MTEC, engineering, computer science, or similar (ETH / FH)
- Solid general engineering and product development skills
- Familiar with programming libraries
- Solution-oriented and self-driven – be the person that takes initiative and brings in ideas!
- Able to adapt and handle different tasks in parallel
- Organized and able to cope well with tight deadlines
- Fluent in English and ideally German

Not necessary, but a plus:

- Programming skills in C++
- Knowledge of VR/AR technologies and market
- Experience in image processing
- Familiarity with operating systems specific details (Wi-Fi & BT protocols)

Our offer!

- An interdisciplinary, highly motivated and young team
- Responsibility and involvement in the creation of revolutionary products
- A visionary, success-oriented and creative start-up environment
- An appealing workplace in the heart of Zurich

Now! The job is available immediately. The minimum duration of the internship is four months, and a regular employment thereafter is an option. If you are interested, don't hesitate to call us (+41 44 295 10 40) or to send your complete application (cover letter, CV with a recent photo, school and work certificates) to jobs@pxl-vision.com.
